

Part I Accumulation and Application of Knowledge Gained Through Basic Research: To Enhance Japan's Research Capability

Chapter 1 Basic Research to Discover New Knowledge	2
Section 1 Importance of Basic Research	2
Section 2 Current Situation of Japan's Fundamental Capability for Science and Technology	6
1 Number of Papers: Declining International Share and Stagnant Participation in Rising Research Areas ...	6
2 Research Funds: Importance of Basic Research Funds to Support Basic Research	8
3 Research Personnel: Decreasing Number of Newly Enrolled Doctoral Students	10
4 Research Environment: International Comparison of Research Hours and the Number of Research Assistants	11
Chapter 2 Value That Basic Research Delivers to Society	16
1 Realization of Blue LED that Opened the Era of LED	16
2 Eradicating Parasitic Infections with a Substance Produced by Bacteria in Soil	18
3 Development of the World's Strongest Permanent Magnet Using Abundant Iron	19
4 Rechargeable Lithium-Ion Battery That Contributed to the Spread of Portable Devices	19
5 Possibility of Realizing New Regenerative Medicine by Somatic Cell Reprogramming (iPS cells)	20
6 New Tool That Enables Precise Editing of Genome Information	22
7 Discovery of Superconductivity and Its Application in Medical and Transportation Fields	23
8 Particle Physics for Exploring the Origin of the Universe and Its Applications in Day-to-Day Settings ..	24
Chapter 3 Technologies That Support and Drive Basic Research	26
1 Detector That Opened a New Door to Physics (Photomultiplier Tube and Ultrapure Water)	27
2 Essential Equipment for Optical Experiments (Diffraction Grating)	29
3 Method to Make Proteins Glow While Keeping Subject Organisms Alive (GFP: Green Fluorescent Protein)	30
4 Technique for Observing Intact Proteins (Cryogenic Electron Microscopy)	31
5 Measurement Method That Dramatically Improved the Efficiency of X-Ray Crystallography (Crystalline Sponge Method)	33
Chapter 4 Promoting Social Application of Research Results	35
1 System-Related Efforts to Promote Social Application of Research Results	35
(1) Law on the Revitalization of Science, Technology and Innovation Creation	35
(2) Tax System	37
(3) Strategic Use of International Intellectual Property and Standardization	40
(4) Improvement of Research Capabilities and University Reform	40
2 System-Related Initiatives to Promote Social Application of Research Results	41
(1) Establishment of a System to Promote Open Innovation	41
(2) Driving an Innovation System Tapping into Regional Strengths	42
Chapter 5 Conclusion: Why the Accumulation and Application of Knowledge Gained Through Basic Research Are Important	43

Part II Measures Implemented to Promote Science and Technology

Chapter 1	Development of Science and Technology	49
Section 1	The Science and Technology Basic Plan	49
Section 2	Council for Science, Technology and Innovation	50
1	Major Endeavors of CSTI in FY2018	52
2	Strategic Prioritization in the Science and Technology-related Budget	52
3	R&D Evaluation of Projects of National Importance	56
4	Major Deliberations at Expert Panels	57
Section 3	Integrated Innovation Strategy	57
Section 4	Administrative Structure and Budget for Science, Technology and Innovation Policies	59
1	Administrative Structure for Science, Technology and Innovation Policies	59
2	Science and Technology Budgets	63
Chapter 2	Acting to Create New Value for the Development of Future Industry and Social Transformation	66
Section 1	Fostering R&D and Human Resources that Boldly Challenge the Future	66
Section 2	Realizing “Society 5.0”	66
1	Vision of Society 5.0	66
2	Undertakings necessary for the realization	67
Section 3	Enhancing Competitiveness and Consolidating Fundamental Technologies in Society 5.0	67
1	Efforts necessary for enhancement of competitiveness	67
2	Strategic strengthening of infrastructure technology	68
Chapter 3	Addressing Economic and Social Challenges	76
Section 1	Sustainable Growth and Self-sustaining Regional Development	76
1	Ensuring stable energy, resources, and food	76
2	Achieving a sustainable society to handle hyper-aging, depopulation, etc.	91
3	Improving competitiveness in manufacturing and value creation	101
Section 2	Ensure Safety and Security for Our Nation and its Citizens and a High-quality, Prosperous Way of Life	102
1	Addressing natural disaster	103
2	Ensuring food safety, living environments, and occupational health	111
3	Ensuring Cybersecurity	116
4	Addressing national security issues	117
Section 3	Addressing Global Challenges and Contributing to Global Development	121
1	Addressing global climate change	121
2	Responding to biodiversity loss	126
Section 4	Pioneering Strategically Important Frontiers	128
1	The promotion of oceanographic R&D	128
2	Promotion of R&D in space science	131

Chapter 4 Reinforcing the Fundamental Capability for STI	141
Section 1 Developing High-quality Human Resources	141
1 Developing, securing and improving career prospects of human resources as intellectual professionals	141
2 Promoting diversity and career mobility	149
Section 2 Promoting Excellence in Knowledge Creation	155
1 Promoting academic and basic research as a source of innovation	155
2 Strategic enhancement of common-platform technology, facilities, equipment, and information infrastructure supporting research and development activity	159
3 Promotion of open science	171
Section 3 Strengthening Funding Reform	173
1 Fundamental funds reform	173
2 Reform of public funds	174
3 Integrated promotion of the national university reform and the research funds reform	177
Chapter 5 Establishing a Systemic Virtuous Cycle of Human Resources, Knowledge and Capital for Innovation	179
Section 1 Enhancing Mechanisms for Promoting Open-innovation	179
1 Enhancing systems of promotion in companies, universities, and public research institutes	179
2 Inducing a virtuous cycle of human resources for innovation creation	186
3 Creating “spaces for co-creation” to concentrate human resources, knowledge, and capital	186
Section 2 Enhancing the Creation of SMEs and Startup Companies to Tackle New Business Opportunities	190
1 Cultivating an entrepreneurial mentality	191
2 Promoting the creation of startup companies at universities	191
3 Creating environments conducive to new business	191
4 Helping initial demand and endorsing the trustworthiness of new products and services	192
Section 3 Strategic Use of International Intellectual Property and Standardization	192
1 Promoting use of IP assets in innovation creation	192
2 Accelerating strategic international standardization and enhancing related support systems	195
Section 4 Reviewing and Improving the Regulatory Environment for Innovation	197
1 Reviewing systems in accordance to new products, services, and business models	197
2 Improving IP systems in response to the tremendous development in ICT	198
Section 5 Developing Innovation Systems that Contribute to “Regional Revitalization”	198
1 Revitalizing regional companies	199
2 Driving innovation systems that make use of local characteristics	200
3 Promoting policies that encourage local initiative	202
Section 6 Cultivating Opportunities for Generating Innovation in Anticipation of Global Needs	203
1 Promoting R&D that anticipates global needs	203
2 Developing systems to promote inclusive innovation	204
Chapter 6 Deepening the Relationship between STI and Society	205
Section 1 Promoting Co-creative STI	205
1 Dialogue and collaboration with stakeholders	205

2	Stakeholder initiatives for co-creation	205
3	Scientific advice for policymaking	207
4	Ethical, legal, and social initiatives	208
Section 2	Ensuring Research Integrity	209
Chapter 7	Enhancing the Capacity to Promote Science, Technology and Innovation	211
Section 1	Reforming Universities and Enhancing their Function	211
1	University Reform	211
Section 2	Reforming National R&D Agencies and Enhancing their Function	212
1	R&D Agency Reforms	212
Section 3	Strategic International Implementation of STI Policies	213
1	Utilization of international frameworks	213
2	Utilization of international organizations	216
3	Utilization of research institutions	218
4	Promotion of Strategic International Activities Related to Science Technology Innovation	218
5	Cooperation with Other Countries	219
Section 4	Pursuing Effective STI Policies and Enhancing the Chief Controller Function	222
1	Following up the Basic Plan	222
2	National Guideline on the Method of Evaluation for Government R&D	222
3	Promoting Policies Supported by Objective Evidence	223
4	Strengthening the Leadership Functions of the CSTI	224
Section 5	Ensuring R&D Investment for the Future	224
	Scientific and Technological Achievements Which Contribute to Daily Life	227

Figures & Tables

Part I

Table 1-1-1	Number of papers and number of adjusted top 10% papers by country/region: top 10 countries/regions.....	7
Figure 1-1-2	Major countries' number of areas of participation and share of the number in the global total number of research areas.....	8
Figure 1-1-3	Changes in operating expense grants for national university corporations.....	9
Figure 1-1-4	Changes in current expenditure grants for private universities, etc.....	9
Figure 1-1-5	Changes in operating expense grants for national R&D agencies.....	9
Figure 1-1-6	Share of the higher education and government sectors in basic research funds.....	10
Figure 1-1-7	Changes in the departmental number of newly enrolled doctoral students.....	11
Figure 1-1-8	Changes in the share of research hours spent by university and college faculty members.....	12
Figure 1-1-9	Changes in the share of hours spent on work activities by university and college faculty members by academic field.....	13
Figure 1-1-10	Changes in the number of research assistants at universities, etc. in Japan.....	14
Figure 1-1-11	The number of research assistants per researcher in major countries.....	15
Figure 1-2-1	Mechanism of a lithium-ion battery.....	20
Figure 1-2-2	Preparation of transplant retinal pigment epithelial cells using iPS cells.....	21
Figure 1-2-3	Structure of CRISPR/Cas9.....	22
Figure 1-2-4	Internal imaging of a volcano on Satsuma Iōjima.....	24
Figure 1-2-5	Image of the observed internal structure of King Khufu's pyramid.....	25
Figure 1-2-6	Comparison of X-ray, CT, and PET screenings.....	25
Figure 1-3-1	History of improvement of microscope resolution.....	27
Figure 1-3-2	Overview of Super-Kamiokande.....	28
Figure 1-3-3	Overview of IceCube.....	28
Figure 1-3-4	Scheme of chirp pulse amplification.....	29
Figure 1-3-5	Sample cooling method.....	32
Figure 1-3-6	Method to obtain the 3D structure of a sample.....	32
Figure 1-3-7	Overview of the crystalline sponge method.....	34
Figure 1-4-1	Virtuous cycle of revitalization of science, technology and innovation.....	35
Figure 1-4-2	Amount of R&D tax credits granted.....	38
Figure 1-4-3	Main venture businesses originated from universities, etc.....	38
Figure 1-4-4	Overview of the FY2019 reform of the R&D tax credit system.....	39
Figure 1-4-5	Relaxation of the Requirements for the Approval of Exemption from Tax on Deemed Capital Gains Regarding Donations of Evaluated Assets to National University Agencies, Etc.....	40
